DETAILED ACTION

The previous restriction requirement, mailed 1/27/06 and based on the wrong claim set, is hereby withdrawn in view of the following requirement.

A preliminary amendment was received and entered on 1/28/02. Claims 2, 4, 6, 7, and 9-11 were amended, and new claims 12-17 were added as requested.

Compliance with Sequence Rules

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the following reason(s). This application clearly fails to comply with the requirements of 37 C.F.R.1.821-1.825. Applicant's attention is directed to the final rule making notice published at 55 FR 18230 (May 1, 1990), and 1114 OG 29 (May 15, 1990). If the effective filing date is on or after July 1, 1998, see the final rulemaking notice published at 63 FR 29620 (June 1, 1998) and 1211 OG 82 (June 23, 1998). **The specification at page 23, lines 6, 9, 12, 15, and 18; page 24, lines 2, 5, 8, and 11; page 27, lines 23 and 24; page 31, line 15 to page 32, line 8; page 43, lines 5-7; page 48, lines 23 and 27; page 49, lines 5-15; page 81, lines 23-27; page 125, lines 32 and 33; page 126, lines 11-14; and disclose either or both of nucleic acid sequences in excess of 9 bases or amino acid sequences in excess of 3 residues that are not accompanied by a SEQ ID NO.** If these sequences are listed in the current Sequence Listing, then the specification and/or Figure should be amended

to include the appropriate SEQ ID NO in each of the passages referred to above. If these sequences are not in the current Sequence Listing, then Applicant must provide:

A substitute computer readable form (CRF) copy of the "Sequence Listing".

A substitute paper copy of the "Sequence Listing", as well as an amendment directing its entry into the specification.

A statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 C.F.R. 1.821(e) or 1.821(f) or 1.821(g) or 1.825(b) or 1.825(d).

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1635

Group 1, claim(s) 1-8 and 12-17 drawn to a genetically modified bacterial cell that does not produce PBGD of non-human origin, a first method of use, and a first method of making.

Group 2, claim(s) 9-11, drawn to a recombinant human PBGD.

The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature that links the various inventions is porphobilinogen deaminase. However, human porphobilinogen deaminase was well known in the art at the time of the invention. See Lannfelt et al (Scand. J. Clin. Lab. Invest. 49: 677-684, 1989). Note that the claimed recombinant human PBGD is considered to be identical to the human PBGD taught by Lannfelt, which was isolated from erythrocytes. So the technical feature linking the inventions cannot be a special technical feature under PCT Rule 13.2 because it does not make a contribution over the prior art.

The special technical feature of each invention is considered to be as listed above.

Conclusion

No claim is allowed.
